InFocus

ConX

Real-time video collaboration with anyone, anywhere, on virtually any device

Powerful Visual Collaboration

To effectively manage your business and stay competitive, you need the ability to easily and reliably connect and share information with anyone, anywhere around the globe, on any of the devices they're using. The ConX ecosystem of cloud services, video collaboration software, and endpoints is the only complete solution that offers powerful visual connections with your organization's people and content, so that you can make decisions confidently and move your business forward – faster.

ConX empowers businesses, government agencies, classrooms, and other organizations to collaborate with more ease and flexibility than ever before possible. Unlike most solutions, ConX offers true interoperability with other video conferencing platforms, providing the freedom to connect with people both inside and outside of your organization, on any device or video conferencing service.

The ConX ecosystem also includes a complete line of video collaboration endpoints for any possible venue or application. From multi-party video conferencing walls, to touchscreen panels for the conference room, to desktop video phones, web and mobile apps, ConX offers more ways to connect than any other solution on the market.

- Easily conduct high-quality video meetings at any time, from virtually any device
- Dual-stream video and data feeds to view and interact with people and information simultaneously
- BrightCam technology adaptively improves image color and detail in any light on supported devices
- Critical SIP, H.323, and Skype for Business interoperability
- Expand your solution with ConX conference room or desktop endpoints, mobile apps, and more

Meet Anywhere, Anytime

The ConX ecosystem is connected by ConX Cloud, a universal platform, cloud-based video and data conferencing service. Join a call from anywhere, on almost any device—including smartphones and tablets, any PC or Mac, ConX devices such as the InFocus Mondopad and ConX video phone, or any other SIP or H.323 endpoints, including those from Polycom, Cisco, LifeSize, and more. There's no need to standardize on a single video conferencing platform and no need to upgrade legacy conferencing hardware or personal devices to enable others to participate in a meeting. ConX Cloud is an easy, scalable, cost-effective solution that works on all of the devices and services your organization and other partners are already using.

See and Share

ConX Cloud offers powerful visual connectivity and dual stream video and data feeds, so that you can view and interact with people, presentations, data, and other content at the same time. ConX Cloud also includes BrightCam technology for intelligent HD video enhancement, adaptively improving video conferencing image color and detail in a variety of ambient light conditions on selected InFocus devices. Only ConX brings your organization's people and information together in one place, providing the freedom and flexibility for everyone to virtually attend a crystal clear meeting and actively share content.
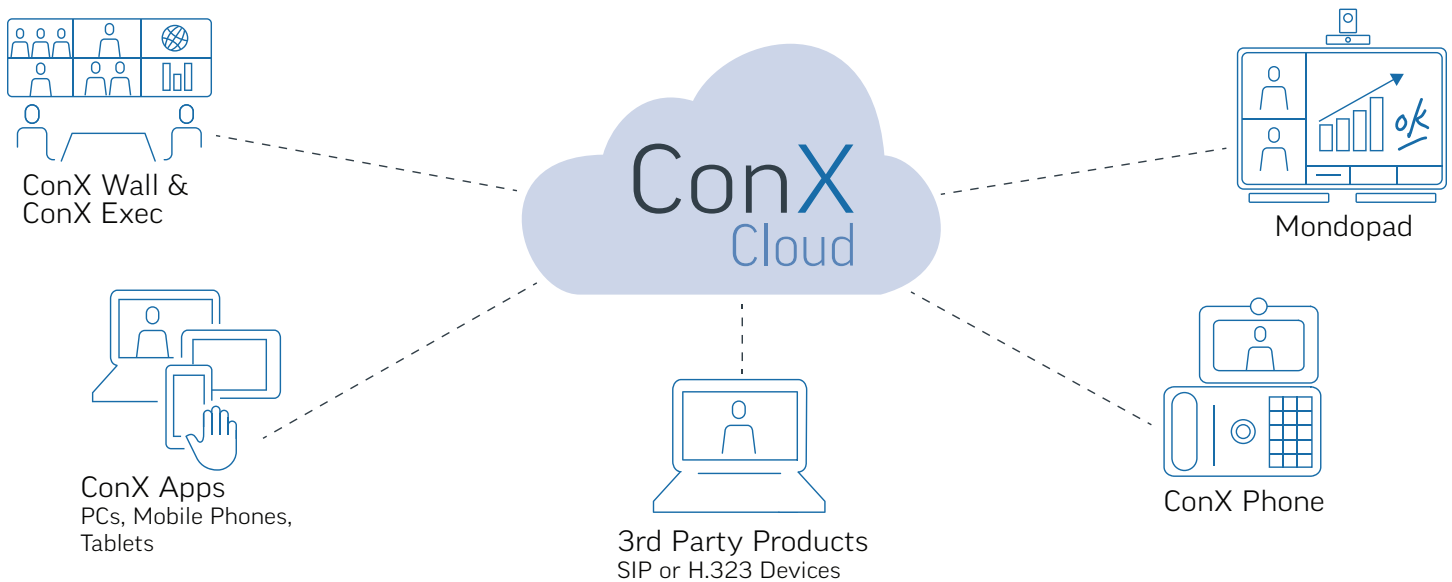

Ready When, and Where, You Are

The ConX ecosystem includes a combination of cloud services, hardware endpoints, and software for third party devices. With video collaboration options for video walls, boardrooms, huddle spaces, office desktops, and mobile devices, we offer a solution for every customer and every application.
