Device Software Subscription (DSS) Overview

Welcome to Enghouse DSS!

The Enghouse Device Software Subscription provides a comprehensive suite of services that help protect your investment, maximize its value and ensure optimal performance throughout the life of your Enghouse conference room system.

The plan includes Help Desk Support, Automatic Software Updates, Pairing to the Enghouse Service and Hardware Advanced Replacement.

An Enghouse conference room system paired to an Enghouse subscription must have an active Enghouse DSS contract at all times to be paired to the Enghouse cloud-based service. This ensures that the conference room system can stay current on software updates, which is necessary when paired to the service, and that it is entitled for Help Desk Support. When your initial DSS contract is nearing expiration, you have the option to renew. As long as you maintain an active DSS contract, your systems will stay paired to the Enghouse service and you can benefit from DSS-specific product features.

Description of Services for Conference Room Systems

- Help Desk Support
 - Phone
 - Email
 - Live chat
 - Web
 - Enghouse Community
- Automatic Software Updates
 - Access to the latest software updates and enhancements
- Pairing to Enghouse Service
 - Centralized device management
 - NAT/firewall traversal
 - Point-to-point calling
- Hardware Advanced Replacement (not included in some plans)
 - Expedited shipment of a product replacement should an incident require it (not included in some plans)

Create your DSS account and pair your devices here: <http://www.lifesize.com/ldp/dss-starter-pack>

Description of Services for Enghouse Share

Your Enghouse Share device comes with a Device Software Subscription (DSS). The term of the included DSS is either two or three years, depending on the version that was purchased.

- DSS for Enghouse Share Includes:
 - Hardware advanced replacement

- Help desk support
- Automatic software updates
- Centralized cloud management

Telephone Support: +877-543-3749
