Device Software Subscription (DSS) Overview

Welcome to Enghouse DSS!

The Enghouse Device Software Subscription provides a comprehensive suite of services that help protect your investment, maximize its value and ensure optimal performance throughout the life of your Enghouse conference room system.

The plan includes Help Desk Support, Automatic Software Updates, Pairing to the Enghouse Service and Hardware Advanced Replacement.

An Enghouse conference room system paired to an Enghouse subscription must have an active Enghouse DSS contract at all times to be paired to the Enghouse cloud-based service. This ensures that the conference room system can stay current on software updates, which is necessary when paired to the service, and that it is entitled for Help Desk Support. When your initial DSS contract is nearing expiration, you have the option to renew. As long as you maintain an active DSS contract, your systems will stay paired to the Enghouse service and you can benefit from DSS-specific product features.
