## SELECTING THE RIGHT SCREEN

Da-Lite offers a wide array of screens each with a choice of projection surfaces. Selecting the right combination to meet your needs is important for optimum results.

The following pages offer guidelines for selecting a screen that suits your application. Although these recommendations will work in most situations, each must be looked at not as a strict rule, but rather as a guideline for determining your actual needs based on your own situation.

For additional help in selecting screens, contact Da-Lite for the free publication "Guide To Selecting Front Projection Screens" or visit [www.da-lite.com/products/selecting.php](http://www.da-lite.com/products/selecting.php). Of course, your Da-Lite Sales Partner is also happy to assist you.

### Four Steps to Selecting the Right Screen

- Determine the optimum **screen size** based on room dimensions, planned audience seating size and arrangement. The rule of thumb is to fit the screen to the audience — not to the projector. Da-Lite recommends the following formula for determining screen size:
  - Screen height should be approximately equal to 1/6 the distance from the screen to the last row of seats, allowing text to be read and detail to be seen in the projected image.
  - Ideally, the first row of seats should be approximately 2 screen heights away.
  - The bottom of the screen should be a minimum of 4 feet above the audience floor, allowing those seated toward the rear of the audience to see the screen. This may require additional screen "drop" for ceiling hung screens.

- Select the appropriate **format** for your projection application. Common formats are as follows:

Common Applications	Aspect ratio Width/Height
NTSC Video	1.33:1
PAL Video	1.33:1
Wide Format	1.60:1
HDTV Video	1.78:1
Letterbox Video	1.85:1
35 MM Filmstrip	1.32:1
2x2 Standard 35MM Double-Frame Slides	1.50:1
SXGA Super XGA Computer	1.25:1
Cinemascope	2.35:1

- Choose the **screen surface** that best suits your projection and viewing requirements. For your convenience, the next four pages provide descriptions and performance characteristics for each front and rear screen surface. If the screen will be used for multiple projection methods, choose the screen surface that meets the requirements of the lesser performing projection method. For example, if using a 1,500 lumen projector and a 2,500 lumen projector, choose the screen surface for the 1,500 lumen projector.
- Pick the **screen type** that best suits your particular needs. For example, choose from front projection (pages 6-8) or rear projection (pages 9-10) screens in either portable, wall or ceiling mounted models in either manual or electric versions. Generally, if your projection application is permanent, then wall and ceiling screens are your best choice. If, however, you find your needs require moving the screen to different locations then a portable screen is a better alternative.

## CALCULATE A CUSTOM SCREEN SIZE

### How to Calculate a Custom Screen Size

Use the following formulas to calculate a custom size. These formulas will assist you in finding the viewing area only.

**NTSC (1.33)**  
**Video Format**  
 Diagonal/1.667=Height  
 Height X 1.33=Width  
 Width/1.33=Height  
 Height X 1.667 = Diagonal

**HDTV (1.78)**  
**Format**  
 Diagonal X 0.49091=Height  
 Diagonal X 0.87247=Width  
 Height X 2.0395=Diagonal  
 Width X 1.14585=Diagonal  
 Height X 1.78=Width  
 Width X 0.561837=Height

**Letterbox (1.85)**  
**Format**  
 Diagonal X 0.4762=Height  
 Diagonal X 0.8800=Width  
 Height X 2.100=Diagonal  
 Width X 1.135=Diagonal  
 Height X 1.85=Width  
 Width X 0.5405=Height

**Cinemascope (2.35)**  
**Format**  
 Diagonal X 0.3916=Height  
 Diagonal X 0.9209=Width  
 Height X 2.554=Diagonal  
 Width X 1.0868=Diagonal  
 Height X 2.35=Width  
 Width X 0.4255=Height

**16:10 Wide (1.60)**  
**Format**  
 Diagonal X 0.530=Height  
 Diagonal X 0.848=Width  
 Height X 1.887=Diagonal  
 Width X 1.179=Diagonal  
 Height X 1.6=Width  
 Width X 0.625=Height

**SXGA (1.25)**  
**Format**  
 Diagonal X 0.625=Height  
 Diagonal X 0.78125=Width  
 Height X 1.60=Diagonal  
 Width X 1.28=Diagonal  
 Height X 1.25=Width  
 Width X 0.80=Height

### Screen Borders and Drop

Black masking borders are standard on most Da-Lite front projection screens at no extra charge. Borders enhance the perceived brightness of an image on a screen. The human eye perceives the image to have more contrast and a sharper picture with brighter colors. Borders also allow the projected image to "bleed-off" the screen for professional appearing presentations.

Drop is also available on most Da-Lite wall, ceiling and electric screens. Drop is the term used for extra fabric added to the top or bottom of the screen to adjust the screen surface to within normal viewing heights. Drop can be specified in either black or white.

## FRONT PROJECTION SCREEN SURFACES

Screen surface can be cleaned.

Flame retardant.

Mildew resistant.

Number shows the optimal width of the ideal viewing half angle.

Indicates Goniophotometer reflectance readings. The higher the number, the greater light transmitted to the audience.

### HD PROGRESSIVE 0.6

Formulated with an extremely wide viewing angle and excellent white field uniformity, the HD Progressive 0.6 screen fabric is ideal for applications where projector brightness and screen size require low gain. The light grey surface offers true color reproduction and excellent depth of modulation. HD Progressive 0.6 was formulated specifically for ultra high definition projection devices.

### HD PROGRESSIVE 0.9

HD Progressive 0.9 is formulated to produce true color and white field uniformity. With a 0.9 gain and an extraordinarily wide half angle of 85 degrees, this screen fabric offers excellent depth of modulation for even the most demanding high definition projection devices.

### HD PROGRESSIVE 1.1

HD Progressive 1.1 is ideal for applications that require a small increase in gain due to screen size and projector brightness. This white surface produces true color and white field uniformity while offering excellent depth of modulation. With a generous half angle of 85°, HD Progressive 1.1 is an excellent choice for large audiences. HD Progressive 1.1 was formulated for high resolution projectors.

### DA-MAT®

Da-Mat® features a smooth, white surface for precise image reproduction and provides an exceptionally wide angle of view with little loss of resolution. It is a highly flexible fabric. Da-Mat® is a great choice for situations with controlled ambient light and where a wide viewing angle is necessary. Available with or without black backing depending on screen model.

*(Seamless in sizes up to 16' in height)*

### HIGH CONTRAST CINEMA VISION

Designed for today's moderate output DLP and LCD projectors, this screen surface is a great choice when video images are the main source of information being projected and where ambient lighting is moderately controlled. With its specially designed gray base surface and a reflective top surface, this screen material is able to provide very good black levels without sacrificing the white level output.

*(Seamless in sizes up to 16' in height)*

### PEARLESCENT

Pearlescent offers a higher amount of reflectivity and brilliance without loss of image quality or resolution and is designed for use in applications where moderate viewing angles are required. This surface is a good choice when producing video images with a lower output projector and where there is a high amount of ambient light present.

*(Seamless in sizes up to 16' in height)*

## FRONT PROJECTION SCREEN SURFACES

### HD PROGRESSIVE 1.1 PERF

Designed for applications where a more realistic soundstage is desired, this fabric allows for the installation of speakers to be placed behind the surface. With virtually no sound loss and excellent image quality, this fabric provides the same optical characteristics as the HD Progressive 1.1 screen surface with specially designed perforations to allow sound to pass through the material.

(Available in sizes up to 8' in height)

### HIGH CONTRAST CINEMA PERF

With the same optical characteristics as High Contrast Cinema Vision, this surface is perforated to allow placement of a center channel speaker behind the screen surface while allowing the sound to transmit through the material. Ideal for use in environments with moderate control of ambient light.

(Available in sizes up to 8' in height)

### 3D VIRTUAL GREY

Designed specifically for passive 3D front projection systems, 3D Virtual Grey is a flexible projection fabric that retains 99 percent of polarized light. Other characteristics include the ability to maintain high extinction values, virtually eliminate ghosting or crosstalk common with stereoscopic 3D projection and excellent image contrast.

(Available in sizes up to 16' in height)

### MATTE WHITE

The most versatile and uniform screen surface for front projection when ambient light is controllable. It enables unlimited viewing angles and perfect uniformity while giving precise definition and reproduction of color or black and white.

(Most standard sizes under 16' in height will be seamless. Contact a Sales Partner or consult the Specification Data Sheet for the specific screen model for seamless sizes)

### HIGH CONTRAST MATTE WHITE

Designed for moderate output DLP and LCD projectors, this screen surface is a great choice when video images are the main source of information being projected and where ambient light is moderately controlled. With its specially designed gray base material and reflective top surface, this screen material is able to provide very good black levels without sacrificing the white level output.

(Available in sizes up to 10' in height)

### VIDEO SPECTRA® 1.5

This screen surface is specially designed with a reflective coating, which provides an increased amount of brightness with a moderately reduced viewing angle. The increased gain of this surface makes it suitable for environments where ambient lighting is uncontrollable and a projector with moderate light output is utilized.

(Available in sizes up to 8' in height)

## FRONT PROJECTION SCREEN SURFACES

### SILVER LITE 2.5

Silver Lite 2.5 is a multi-purpose front projection surface that is optimized for passive linear and circular 3D applications and is also an excellent 2D screen material. For passive 3D applications, the silver surface maintains 99.3% of polarized light and the 2.5 gain of the material compensates for the light lost in the polarization filtering process. The polarization retention and high extinction ratio eliminate the ghosting or crosstalk common with stereoscopic 3D projection. For 2D projection, the gain and high contrast characteristics of the material make it perfect for projection in high ambient light conditions or for use with a low output projector.

*(Available in sizes up to 8' in height)*

### HIGH POWER®

This screen surface provides the reflectivity and optical characteristics of a traditional glass beaded surface with the ability to clean the surface when necessary. Its smooth textured surface provides the highest gain of all front projection screen surfaces with little loss of resolution. The moderate viewing angle and its ability to reflect light back along the projection axis make this surface the best choice for situations where there is a moderate amount of ambient light and the projector is placed on a table-top or in the same horizontal viewing plane as the audience.

*(Seamless in sizes under 8' in height)*

### HIGH CONTRAST HIGH POWER®

This revolutionary screen surface provides a unique combination of high gain along with contrast enhancement due to its gray base and highly reflective top surface. The result is a screen surface with moderate viewing angles and the ability to reflect light back towards the source. These characteristics make this surface an excellent choice for environments with a moderate amount of ambient light and a projector which is placed on a table top or in the same horizontal viewing plane as the audience.

*(Seamless in sizes under 8' in height)*

## REAR PROJECTION SCREEN SURFACES

### Flexible Fabric Screens (Require Tensioning)

#### DA-TEX®

A translucent, neutral gray surface that offers high transmission and low reflectance values for optimal viewing. It yields excellent color rendition, image contrast and a moderately wide viewing angle. Suitable for rear projection applications with high ambient light.

(Seamless in sizes up to 16' in height)

#### DUAL VISION

Dual Vision is a flexible projection fabric capable of both front and rear projection. The Dual Vision surface is ideal for video projection under controlled light conditions. With an exceptionally wide viewing cone and light gray tint, each seat in the audience will observe a uniform, sharp image with no color shift. Surface needs to be tensioned due to its flexible nature.

(Seamless in sizes up to 16' in height)

#### ULTRA WIDE ANGLE

Flexible Fabric Screen: Ultra Wide Angle is a flexible rear projection fabric formulated for applications where exceptionally wide viewing angles are desired and ambient light is controlled. Based on its ability to diffuse light uniformly, Ultra Wide Angle fabric is ideal for installations utilizing multiple projection edge blending or wide format screens with short focal length projection lenses. By virtue of it

(Seamless in sizes up to 16' in height)

#### 3D VIRTUAL BLACK®

Flexible Fabric Screen: 3D Virtual Black® is a flexible rear projection fabric for passive 3D that retains 99 percent polarization, thereby maintaining a high fidelity 3D image and virtually eliminating all image ghosting. The black surface finish provides excellent image contrast and its 1.3 gain offers exceptionally vivid images even in ambient light conditions.

(Seamless in sizes up to 16' in height)

## CEILING RECESSED ELECTRIC SCREENS

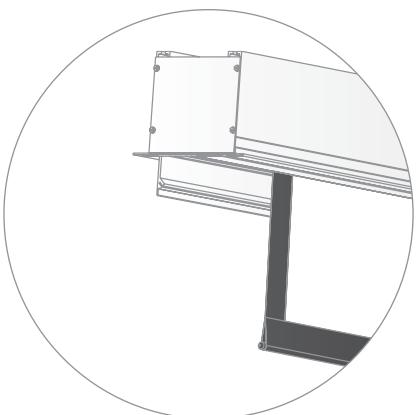

Da-Lite offers the world's widest selection of electric screens for the ultimate in convenience and professional presentations. You'll find Da-Lite's ceiling recessed electric screens meet the demanding needs of business meeting rooms, educational institutions, hospitality and home theater applications.

All Da-Lite ceiling recessed electric screens offer as standard features: black borders and preset adjustable limit switches to automatically stop the screen at the desired viewing level.

**CEILING RECESSED ELECTRIC SCREEN CASES**

## CEILING RECESSED ELECTRIC SCREENS

- All screens are standard with borders except Arena and Studio.
- Extra drop available in black or white.
- Custom widths available.
- Other formats available upon request.
- High Contrast (HC) Matte White fabric up to 10' high will be seamless.
- Video Spectra 1.5, High Power® and High Contrast High Power® fabric up to 8' high will be seamless.
- All tensioned screens will be seamless in standard sizes.
- All tensioned front projection screens are standard with black backing.

### STANDARD BUILT-IN CONTROLS

Low Voltage Control (Tensioned and Non-Tensioned)		Silent Motor (Tensioned and Non-Tensioned in sizes up to 10' x 10')
• Advantage® Deluxe	• Contour®	• Advantage®
• Horizon	• Advantage®	• Contour®
• Ascender®	• Tensioned Conference	

### BUILT-IN CONTROL OPTIONS

Many of Da-Lite's screens are available with built-in control options.  
Choose your control option, add the appropriate suffix to the screen part number and the option cost to the screen price.

Description	Available Models (Tensioned and Non-Tensioned)		Suffix

Concealed-In-The-Ceiling Tensioned Electric Screen with Closure Doors Designed with the Installer In Mind

- Tensioning system provides an extra flat surface for optimum image quality.
- Handsome white case and closure doors provide a clean look and allow easy installation of ceiling tiles.
- Designed to have the case installed during the "rough-in" stages of construction and the fabric assembly during the finish stage.
- The Tensioned Advantage® Deluxe Case meets Underwriters Laboratories (UL) Plenum Testing Standards for use in air handling spaces.
- Standard with built-in Low Voltage Control.

Available Screen Surfaces: HD Progressive 0.6, HD Progressive 0.9, HD Progressive 1.1, Da-Mat®, Pearlescent, High Contrast Cinema Vision, High Contrast Cinema Perf, HD Progressive 1.1 Perf, and Da-Tex® (rear).

*See pages 6-9 for surface descriptions.*

Available Screen Surfaces: HD Progressive 0.6, HD Progressive 0.9, HD Progressive 1.1, Da-Mat®, Pearlescent, and High Contrast Cinema Vision.

See pages 6-9 for surface descriptions.

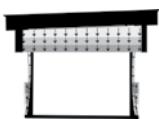

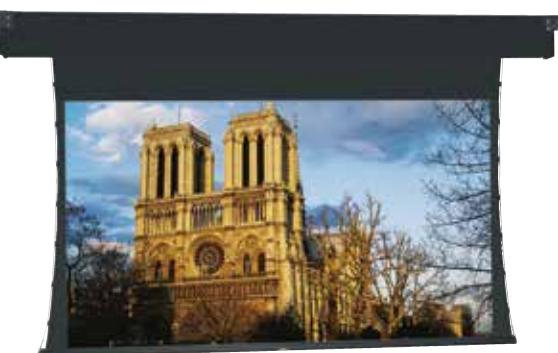

For optional  
remote control  
operation, see  
options on pages  
39-40.

Concealed-In-The-Ceiling Electric Tensioned Video Conferencing Screen with Closure Doors

- Tensioning system provides an extra flat surface for optimum image quality.
- Allows the projection screen and video conferencing camera to be completely concealed when not in use.
- Designed to be recessed in the ceiling and includes a trim flange for a clean, finished installation.
- Shelf for the video conferencing camera lowers via arms behind the screen surface.
- When retracted, the screen surface and video conferencing shelf arms are completely concealed by closure doors, allowing the room aesthetics to remain undisturbed.

**TENSIONED HORIZON ELECTROL®**

Standard  
remote and  
wall keypad

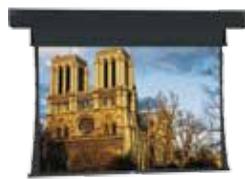

Optional Radio  
Frequency  
Receiver

## Optimum Viewing of Multiple Video Image Formats

- Tensioning system provides an extra flat surface for optimum image quality.
- Allows four position masking with the touch of a button.
- Unique "step-back" system ensures the masking remains flush against the surface of the screen preventing distracting shadows around the projected image.
- Standard sizes in native Video or HDTV formats with masking to Letterbox and Cinemascope formats.
- Equipped with a wall keypad and infrared remote control, you can automatically open and close the screen, halt operation and position the screen into any of the four aspect ratios.
- Optional radio frequency receiver is available. See page 15 for additional built-in control options.

## CEILING RECESSED ELECTRIC SCREENS

### ELECTRIC SCREEN CONTROLS AND ACCESSORIES

#### Single Motor Low Voltage Control System

- Controls all Da-Lite single motor electric screens.
- Includes control module and three button wall switch with Decora® cover plate.

#### Dual Motor Low Voltage Control System

- Controls all Da-Lite Dual Masking Screens or Da-Lift and single motor screen combination.
- Includes control module and three button wall switch with Decora® cover plate.

#### Single Motor Low Voltage Control System with a Three Button Wireless Radio Frequency Remote Receiver and Transmitter

- Controls all Da-Lite single motor electric screens.
- Includes control module and three button wall switch with Decora® cover plate.
- Three button control radio frequency transmitter with receiver.
- Single-touch control operates up to 75 feet.

#### Dual Motor Low Voltage Control System with a Three Button Wireless Radio Frequency Remote Receiver and Transmitter

- Controls all Da-Lite Dual Masking Screens or Da-Lift and single motor screen combination.
- Includes control module and three button wall switch with Decora® cover plate.
- Three button control radio frequency transmitter with receiver.
- Single-touch control operates up to 75 feet.

#### Single Motor Low Voltage Control System with a Three Button Wireless Infrared Remote Receiver and Transmitter

- Controls all Da-Lite single motor electric screens.
- Includes control module and three button wall switch with Decora® cover plate.
- Three button control infrared transmitter with receiver.
- Single-touch control operates up to 50 feet.

#### Dual Motor Low Voltage Control System with a Three Button Wireless Infrared Remote Receiver and Transmitter

- Controls Da-Lite Dual Masking Screens or Da-Lift and single motor screen combination.
- Includes control module and three button wall switch with Decora® cover plate.
- Three button control infrared transmitter with receiver.
- Single-touch control operates up to 50 feet.

#### Infrared Remote Receiver and Transmitter

For use with:

- Single and Dual Motor Low Voltage Controllers.
- Electric screens with built-in Low Voltage Control.

#### Radio Frequency Remote Receiver and Transmitter

For use with:

- Single and Dual Motor Low Voltage Controllers.
- Electric screens with built-in Low Voltage Control.

#### Video Projector Interface

- DC controls allowing screen to be raised or lowered automatically when projector is turned ON or OFF.
- Includes white three button switch for manual operation with Decora® cover plate.
- Projector must have a 12 volt or 5 volt lead to operate the interface.

#### Radio Frequency Range Extender

- Extends the range of the Radio Frequency remote by 20' to 25'.

## ELECTRIC SCREEN CONTROLS AND ACCESSORIES

### Key Locking Switch Cover Plate

- Hinged, goes over cover plate.
- Opens with a key to allow access to 110 volt switch or low voltage wall switch.
- Brushed stainless steel finish.

### Key Operated, 110 Volt Switch

- Flush mounted wall control switch is key activated for security.
- Use with 110 volt systems only.
- White cover plate.

### Replacement Wall Switch 110 Volt with Decora® Cover Plate

Available colors

- White (standard)
- Ivory
- Stainless Steel

### Low Voltage Wall Switch with Decora® Cover Plate.

Available colors

- White (standard)
- Ivory

Replacement or extra wall switch for a Low Voltage Control System.

### Red Laser Pointers

Select from three models.

- Laser Pointer
- Blinking Laser Pointer
- Jumbo Laser Pointer

### Green Laser Pointers

Select from two models.

- Laser Pointer
- Jumbo Laser Pointer

### RF PowerPoint Remote with Green Laser Pointer

- Page Up/Down functions.
- Radio frequency range of 30 feet.
- Extremely visible green laser pointer.

### Net-200 Ethernet Controller

- Ethernet interface for screens with built-in SCB-200.

### WC-200 Wall Controller

- Decora® style wall controller for screens with built-in SCB-200.

### IR-200 Infrared Remote Control

- Infrared transmitter and receiver for screens with built-in SCB-200.

### External SCB-100 Serial Control Board

- Dual RS-232 relay control.
- Controls one or two single motor screens, a screen and Da-Lift or a masking screen with two motors.

### Net-100 Ethernet Serial Adapter

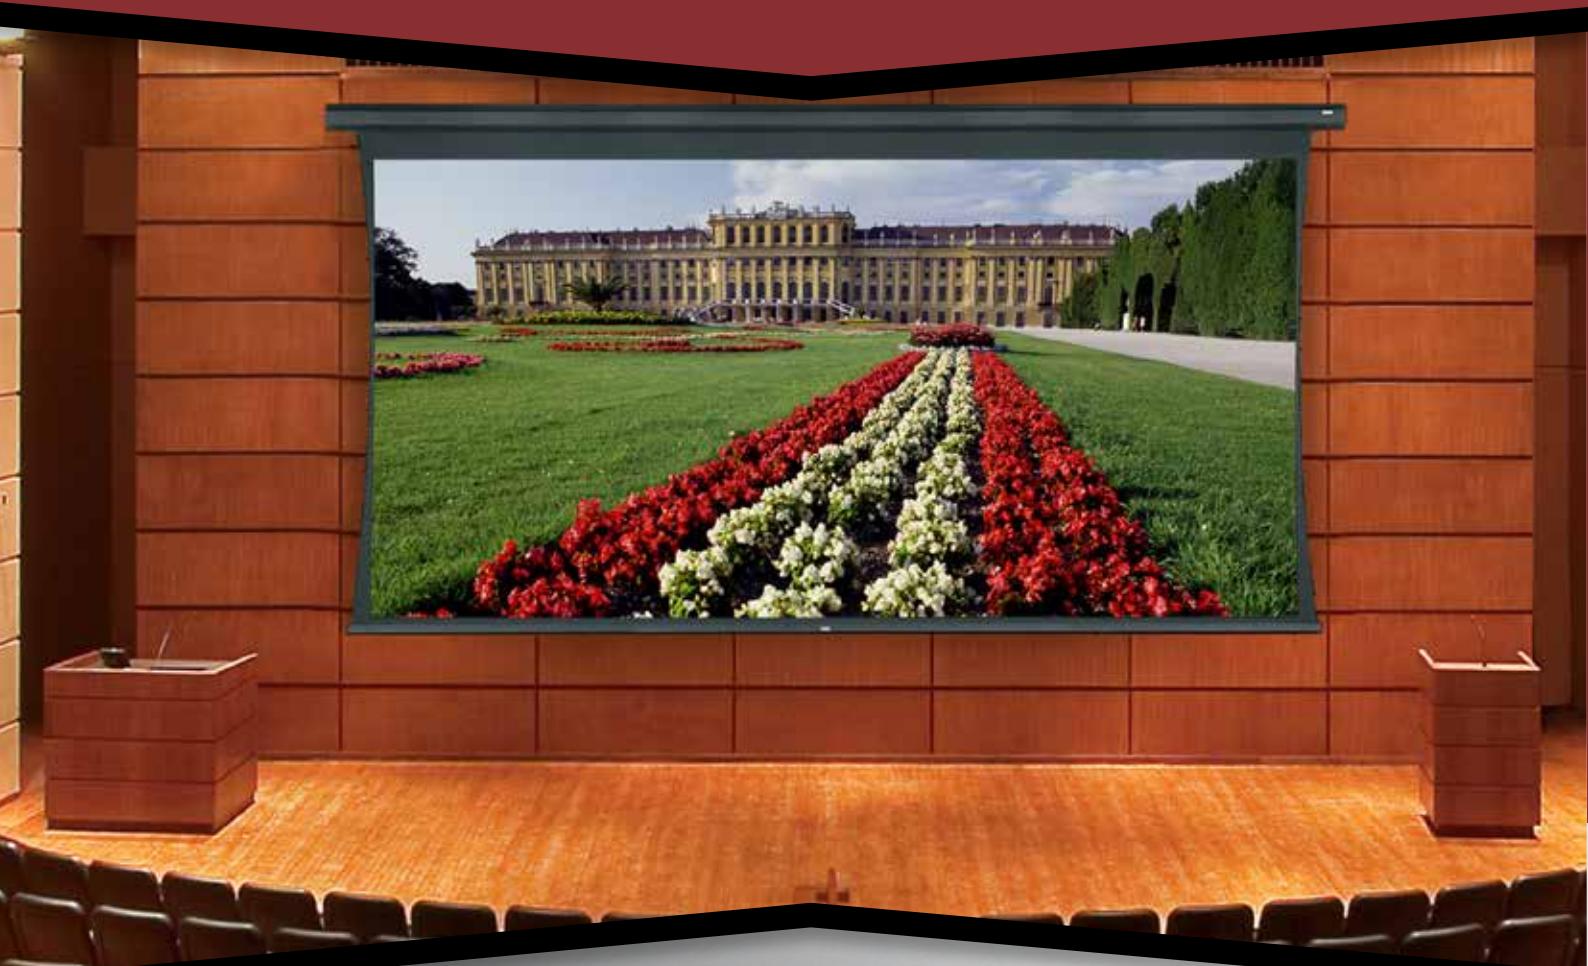

- Ethernet interface for external SCB-100 or electric screens with built-in SCB-100.

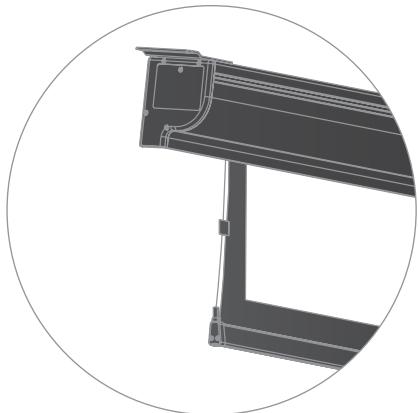

## WALL AND CEILING ELECTRIC SCREENS

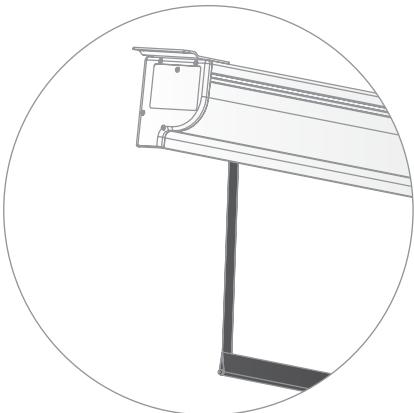

Da-Lite offers the world's widest selection of wall and ceiling mounted electric screens for the ultimate in convenience and professional presentations. You'll find Da-Lite's wall and ceiling electric screens meet the demanding needs of business meeting rooms, educational institutions, hospitality and home theater applications.

All Da-Lite wall and ceiling electric screens offer as standard features: black borders (except for the Studio and Arena) and preset adjustable limit switches to automatically stop the screen at the desired viewing level.

**WALL AND CEILING ELECTRIC SCREEN CASES**

Tensioned Contour® Electrol®

Contour® Electrol®

Tensioned Cosmopolitan® Electrol®

Cosmopolitan® Electrol®

Ascender® Electrol®

## WALL AND CEILING ELECTRIC SCREENS

- All screens are standard with borders except Arena and Studio.
- Extra drop available in black or white.
- Custom widths available.
- Other formats available upon request.
- High Contrast (HC) Matte White fabric up to 10' high will be seamless.
- Video Spectra 1.5, High Power® and High Contrast High Power® fabric up to 8' high will be seamless.
- All tensioned screens will be seamless in standard sizes.
- All tensioned front projection screens are standard with black backing.

### STANDARD BUILT-IN CONTROLS

Low Voltage Control (Tensioned and Non-Tensioned)		Silent Motor (Tensioned and Non-Tensioned in sizes up to 10' x 10')
• Advantage® Deluxe	• Contour®	• Advantage®
• Horizon	• Advantage®	• Contour®
• Ascender®	• Tensioned Conference	

### BUILT-IN CONTROL OPTIONS

Many of Da-Lite's screens are available with built-in control options.  
Choose your control option, add the appropriate suffix to the screen part number and the option cost to the screen price.

Description	Available Models (Tensioned and Non-Tensioned)	Suffix
Low Voltage Control	• Cosmopolitan® • Large Cosmopolitan®	L
Video Projector Interface	• Advantage® • Advantage® Deluxe • Contour® • Cosmopolitan®	I
SCB-100 (RS-232 Control)	• Contour® • Advantage® Deluxe • Advantage® • Large Advantage®	R
SCB-200 (RS-232 Control with multiple positioning)	• Contour® • Advantage® Deluxe • Advantage®	M
Silent Motor*	• Cosmopolitan® • Horizon • Dual Masking	S
Silent Motor with Low Voltage Control*	• Cosmopolitan®	LS

\*Available in sizes up to 10' x 10'

Available Screen Surfaces: Matte White.

See pages 6-9 for surface descriptions.

For optional  
remote control  
operation, see  
options on pages  
39-40.

- Allows screen to be recessed into the floor for a concealed appearance or installed into a decorative surrounding.
- Motorized scissor mechanism raises the screen surface from the housing to ensure smooth operation.
- A door housing keeps the screen and lift mechanism hidden until the screen is activated.

## ELECTRIC SCREEN CONTROLS AND ACCESSORIES

## Single Motor Low Voltage Control System

- Controls all Da-Lite single motor electric screens.
- Includes control module and three button wall switch with Decora® cover plate.

## Dual Motor Low Voltage Control System

- Controls all Da-Lite Dual Masking Screens or Da-Lift and single motor screen combination.
- Includes control module and three button wall switch with Decora® cover plate.

## Single Motor Low Voltage Control System with a Three Button Wireless Radio Frequency Remote Receiver and Transmitter

- Controls all Da-Lite single motor electric screens.
- Includes control module and three button wall switch with Decora® cover plate.
- Three button control radio frequency transmitter with receiver.
- Single-touch control operates up to 75 feet.

## Dual Motor Low Voltage Control System with a Three Button Wireless Radio Frequency Remote Receiver and Transmitter

- Controls all Da-Lite Dual Masking Screens or Da-Lift and single motor screen combination.
- Includes control module and three button wall switch with Decora® cover plate.
- Three button control radio frequency transmitter with receiver.
- Single-touch control operates up to 75 feet.

## Single Motor Low Voltage Control System with a Three Button Wireless Infrared Remote Receiver and Transmitter

- Controls all Da-Lite single motor electric screens.
- Includes control module and three button wall switch with Decora® cover plate.
- Three button control infrared transmitter with receiver.
- Single-touch control operates up to 50 feet.

## Dual Motor Low Voltage Control System with a Three Button Wireless Infrared Remote Receiver and Transmitter

- Controls Da-Lite Dual Masking Screens or Da-Lift and single motor screen combination.
- Includes control module and three button wall switch with Decora® cover plate.
- Three button control infrared transmitter with receiver.
- Single-touch control operates up to 50 feet.

## Infrared Remote Receiver and Transmitter

For use with:

- Single and Dual Motor Low Voltage Controllers.
- Electric screens with built-in Low Voltage Control.

## Radio Frequency Remote Receiver and Transmitter

For use with:

- Single and Dual Motor Low Voltage Controllers.
- Electric screens with built-in Low Voltage Control.

## Video Projector Interface

- DC controls allowing screen to be raised or lowered automatically when projector is turned ON or OFF.
- Includes white three button switch for manual operation with Decora® cover plate.
- Projector must have a 12 volt or 5 volt lead to operate the interface.

## Radio Frequency Range Extender

- Extends the range of the Radio Frequency remote by 20' to 25'.

## ELECTRIC SCREEN CONTROLS AND ACCESSORIES

### Key Locking Switch Cover Plate

- Hinged, goes over cover plate.
- Opens with a key to allow access to 110 volt switch or low voltage wall switch.
- Brushed stainless steel finish.

### Key Operated, 110 Volt Switch

- Flush mounted wall control switch is key activated for security.
- Use with 110 volt systems only.
- White cover plate.

### Replacement Wall Switch 110 Volt with Decora® Cover Plate

#### Available colors

- White (standard)
- Ivory
- Stainless Steel

### Low Voltage Wall Switch with Decora® Cover Plate.

#### Available colors

- White (standard)
- Ivory

Replacement or extra wall switch for a Low Voltage Control System.

### Red Laser Pointers

#### Select from three models.

- Laser Pointer
- Blinking Laser Pointer
- Jumbo Laser Pointer

### Green Laser Pointers

#### Select from two models.

- Laser Pointer
- Jumbo Laser Pointer

### RF PowerPoint Remote with Green Laser Pointer

- Page Up/Down functions.
- Radio frequency range of 30 feet.
- Extremely visible green laser pointer.

### Net-200 Ethernet Controller

- Ethernet interface for screens with built-in SCB-200.

### WC-200 Wall Controller

- Decora® style wall controller for screens with built-in SCB-200.

### IR-200 Infrared Remote Control

- Infrared transmitter and receiver for screens with built-in SCB-200.

### External SCB-100 Serial Control Board

- Dual RS-232 relay control.
- Controls one or two single motor screens, a screen and Da-Lift or a masking screen with two motors.

### Net-100 Ethernet Serial Adapter

- Ethernet interface for external SCB-100 or electric screens with built-in SCB-100.

## ELECTRIC SCREEN CONTROLS AND ACCESSORIES

## Floating Mounting Bracket for Cosmopolitan® and Tensioned Cosmopolitan®

Allows screen to be mounted onto wall or ceiling and aligned left to right (for sizes up to 9' x 12').

Available colors

- White
- Black

## Ceiling Trim Kit for Cosmopolitan® Electrol® and Tensioned Cosmopolitan® Electrol®

- 8' wide and under
- over 8' wide up to 10'
- over 10' wide up to 12' wide (except 12' x 12')

## STANDARD AND CUSTOM VENEERS

## Veneers

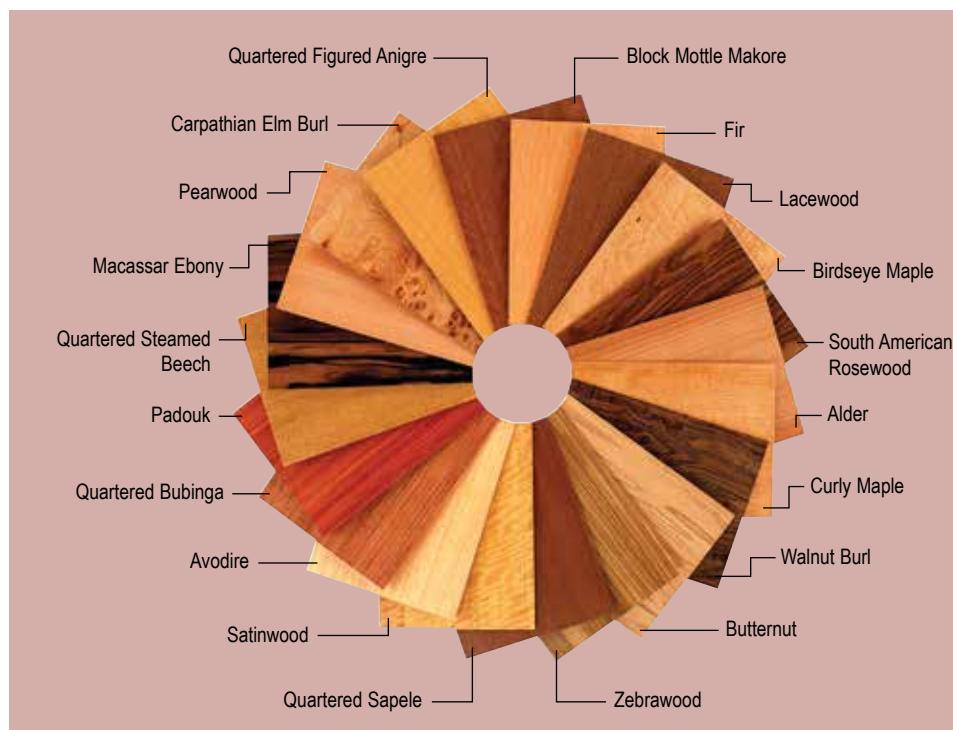

**Hand-Rubbed Veneers**  
Real wood veneers have hand rubbed finishes for a deep, rich appearance. Select from the standard offerings shown here or contact Da-Lite for custom veneers and color matching.

## Exotic Woods

## Custom Veneers and Finishes

In addition to our seven standard veneers, we offer a wide variety of exotic veneers and finishes. Shown is a small sampling of the exotic varieties of wood veneers that are available. Through Da-Lite's exclusive five step finishing process, we are capable of matching any veneer finish. With a unique hand staining and filling procedure, we can color match any finish with a deep, rich tone to enhance every room decor.

*Custom laminates, veneers and color matching available upon request.*

Finishes and textures of veneers may vary in tone or character from these printed representations. For critical color matching, contact Da-Lite for actual veneer and laminate samples.

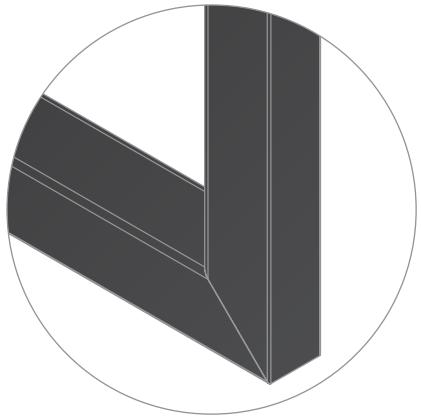

## FIXED FRAME SCREENS

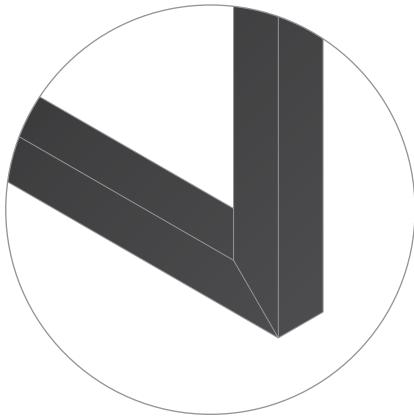

Da-Lite's fixed frame screens are available in a wide variety of styles to blend with virtually any decor. Offering the ultimate ease of installation, these screens mount easily on the wall or inside cabinetry. If the design calls for multiple formats, a masking system can be added for greater versatility.

## CINEMA CONTOUR®

## Permanently Mounted Wall Screen

- Designed for mounting on the wall or into a wall opening.
- Cinema Contour has a 45° angle cut frame for a sleek, modern appearance.
- Surface mounts to the back of an aluminum frame that provides a masking border.
- Frame standard with Pro-Trim® finish, a fabric frame covering that aesthetically enhances the appearance of the installation while absorbing light that surrounds the viewing area.

**Available Screen Surfaces:** HD Progressive 0.6, HD Progressive 0.9, HD Progressive 1.1 Da-Mat®, Da-Tex® (Rear), Pearlescent, High Contrast Cinema Vision, High Contrast Cinema Perf, Dual Vision, HD Progressive 1.1 Perf, 3D Virtual Black®, and 3D Virtual Grey

Also available with seven veneer frame finishes, see page 178 for veneer choices.
